Onion Token Whitepaper

Introduction

Onion Token is a decentralized cryptocurrency project aiming to build a secure, anonymous, and transparent financial ecosystem powered by blockchain technology.

Vision & Mission

- To provide an anonymous and censorship-resistant payment system.

- To build a strong, self-governing community that drives the project's development.

- To establish partnerships and integrations within the DeFi and Web3 space.

Technology & Security

Onion Token is built on a high-performance blockchain, leveraging modern cryptographic standards for user privacy. The protocol ensures fast transactions, low fees, and no data tracking.

Tokenomics

- Total Supply: 1,000,000,000 $ONION

- Taxes: 0% (Fair Launch)

- Allocation:

  * 50% Community distribution

  * 30% Development

  * 10% Marketing

  * 10% Liquidity reserves

Utility & Use Cases

- Peer-to-peer payments with full anonymity

- Staking rewards for token holders

- Integration into DeFi protocols and liquidity pools

- NFT marketplace support and token-based governance

Governance

Onion Token is fully community-driven. Future decisions, upgrades, and treasury usage will be

managed through a decentralized governance system.

Roadmap

Q3 2025

- Fair launch and initial DEX listings

- Onboarding first DeFi partners

Q4 2025

- Launch staking platform

- First NFT drops and partnerships

- Expand marketing and community growth

Q1 2026

- Listing on centralized exchanges (CEX)

- Additional DeFi integrations

- Advanced privacy features
